

PERINATAL FORUM

Doppler in pregnancy

(for non-sonographers)

Wednesday 27 October 2004

This session is aimed at midwives and obstetricians, and follows our recent, well-attended first workshop on Doppler for ultrasonographers. After an overview of the main features of Doppler, there will be a presentation of the clinical role of Doppler in pregnancy, and the discussion of several case scenarios.

Programme

- From 15:30 Coffee / Tea
- 16:00 **Introduction: Doppler and adverse perinatal outcome**
Prof Jason Gardosi – Director, Perinatal Institute
- 16:15 **How Doppler works**
David Cole - Senior Lecturer, UCE
- 17:00 **Practical Applications and Indices: PI, RI, EDF etc**
Lynn North - Research Sonographer, Perinatal Institute
- 17:15 **Venous Doppler**
- 17:30 Light refreshments
- 18:00 **The clinical role of Doppler in early and late pregnancy**
*Dr Harry Gee - Consultant Obstetrician and Gynaecologist,
Birmingham Women Hospital*
- Case presentations**
*Dr Mike Wyldes – Consultant Obstetrician and Gynaecologist,
Birmingham Heartlands Hospital*
- 19:15 **Discussion**
- 19:30 Close

Booking form
