

PERINATAL FORUM

Thursday 10 February 2005

18:00 – 20:00

Buffet & Drinks from 17:15

Why Mothers Die

The 6th Report of the UK Confidential Enquiries into Maternal Deaths (CEMD) was published late last year, covering the period 2000-2002. It holds many important messages on risk factors, causes, management and prevention.

This meeting will focus on the key aspects of the report, and include discussions on midwifery care and psychiatric causes. It is relevant for all professionals involved in maternity services, in the community as well as the acute sector.
