Wednesday 17 May 2006
10:00 – 16:00
(Registration, coffee/tea from 09:15)

NPfIT for Maternity II

It has been 12 months since our first meeting, and progress within the National Programme for IT has not been as originally planned. There are now even concerns about the place of Maternity IT within national priorities. Yet at the same time, for all maternity units, there are ever more urgent issues to meet the challenges of CNST, the NSF and various public health targets. This meeting aims to give an update about the National Programme as concerns maternity, and to provide an opportunity for obstetricians / maternal fetal medicine specialists, senior midwives and IT managers, as well as representatives of CfH and the LSPs to discuss the best ways forward.

SESSION 1

10:00	**Welcome & Introduction**
10:10	**Do Once And Share**
