

Maternity Services Dataset Development

Presentation to Perinatal Forum
18th May 2005

Anil Yogasundram
Senior Project Manager (Datasets)
Health and Social Care Information Centre

Maternity Services Dataset Development

- Context – definition and role of datasets
- The dataset development process
- Towards a dataset for maternity

What are datasets about?

- Secondary—use record specifications
- Framework for extracts from or views of clinical records
- To support NSF implementation and other secondary purposes

Developing a dataset

Towards a national maternity dataset

- NSF the key driver
- Building on existing work
- Project being initiated

Maternity Dataset Development Project

- Part of NHS Datasets Service
- Being initiated with DH Policy sponsorship
- Reference Group
- Close links with NPfIT developments

NPfiT involvement

- Ensuring integration
- Sandpit testing
- Implementation across 1 LSP
- Roll-out of functionality

NHS involvement

- Input to design processes
- Participation in testing
- Ongoing assembly and usage of data
