To: Walsall PCT
Walsall Manor Hospital
NHS West Midlands

Dear Colleague,

This is the **third interim report of the IfH data collection programme**. We present results from Q3 as well as a totals for the first 3 quarters. KPI3, the indicator concerning detection of IUGR, is also included.

For **Walsall**, the key points are

- Excellent ascertainment of cases;
- however record keeping is often substandard, with frequent omissions of essential information;
- following clarification in the manner in which booking is recorded, the unit has made very good progress in Q3;
- FGR / IUGR detection rates are low and reflect the regional average. However IUGR rates are high in the Walsall population, and suggest a need for a renewed focus on this indicator;
- smoking-in-pregnancy targets are met and cessation rates are better than the WM average;
- breastfeeding initiation rates are below the regional average.

Also included are a preliminary set of indicators from the WM dataset, with demographics and characteristics of pregnancies for Walsall. A detailed analysis will follow in the 12 month report, due June 2010.

With sincere regards

Professor Jason O. Gardosi
Director, Perinatal Institute

West Midlands Investing for Health - Perinatal Data Collection Project

Q3 Report (September – December 2009)

This is the third quarterly report on the regional perinatal data collection established under the WM Investing for Health Perinatal & Infant Mortality Programme (2c). In this interim report we present also totals for the first 3 quarters.

1. **Data quality:** Over the last few months, a team from the Perinatal Institute have been undertaking a case note audit in each unit to assess the accuracy of the process and validity of the data entered on the Institute's Perinatal Episode Electronic Record (PEER) . **The audit has demonstrated good overall accuracy.** Individual detailed reports are being sent to each maternity unit during April 2010.
2. However the same audit has shown **deficiencies in the quality of record keeping** in the maternity record. This can affect each of the indicators presented in this report. The importance of accurate recording is also being highlighted in each of the Confidential Enquiries into perinatal deaths we are currently reporting on. The SHA's IfH programme has commissioned PI to develop a quality assurance toolkit for maternity records.
3. Submission rates have improved significantly, but ascertainment is still only around 70% for the region. There are still staffing issues in relation to data clerks which we feed back on regularly, together with a fortnightly activity report on whether the submission targets are being achieved. **It is essential that data clerks are fully supported locally and their posts maintained through contract negotiations.**
4. The information collected is allowing us to develop a baseline for KPIs as well as demographics, characteristics of pregnancies and factors affecting outcome. At the end of this report, we are providing preliminary rates for the main data items being collected through the WM maternity dataset. **PEER has rapidly established itself as the largest uniform maternity data collection system in England,** and will be an important source of information about the quality of care, equity and causes of adverse outcome.
5. Since early this year, we have been running a series of workshops for representatives from PCTs and maternity units, and provided them with 'data wizards' which **facilitate direct access to their respective organisations' data collected on PEER.**
6. In the coming weeks, we are commencing **pilots for Digital Pens**, which will allow real time data collection and reporting. This will be particularly important for data items such as Early Booking rates, which we can currently only provide after delivery, i.e. 6 or more months in arrears. It will also provide snapshots of current caseloads and levels of maternal medical and social risk, to facilitate effective workforce planning.

The next report will be in June 2010 and will include 12 months of data together with a comprehensive subgroup analysis. In the meantime, the PI team will continue to respond to individual queries as best possible (for details on submitting data requests, see www.pi.nhs.uk/data)

PEER Team
Perinatal Institute

March 2010

Table 1: Data submitted from WM maternity units

| Unit | WTE funded | WTE employed (Feb 2010) | Recruitment details | Q1 | | | Q2 | | | Q3 | | | Comments |

|---------------|-----|---|-------------------------------|-----|-----|------|-----|-----|-----|-----|-----|-----|--------------------|

Interim (Q1) submission target

<60% 60-79% ≥80%

Project submission target

<80% 80-89% ≥90%

Submission rates are calculated as the number of cases submitted from each quarter, as a proportion of all births in that quarter (estimated on the basis of last available data from 2008).

Data received is dependant upon the completeness of notes recorded by care providers, and sustained capacity of data clerks ensured by Units and respective PCTs.

The PI are about to commence pilots of Digital Pens for community midwives to facilitate ascertainment of real-time data.

KPI 1a: Completed health & social assessment before 13 weeks

Target: 80%

| < 60% | 60-79% | ≥ 80% |
|-------|--------|-------|
|-------|--------|-------|

www.pi.nhs.uk/rpnm/lfH_KPI_Evidence_Targets.pdf

| | KPI 1a - Completed Assessment < 13 Weeks | | | | | | | | | | | |
|-------------------------|--|------|-------|--------------------------|------|-------|--------------------------|------|-------|--------------------------|-------|-------|
| | Q1 | | | Q2 | | | Q3 | | | Total | | |
| | Cases with required data | n | % | Cases with required data | n | % | Cases with required data | n | % | Cases with required data | n | % |
| West Midlands | 6774 | 5052 | 74.6% | 10875 | 8545 | 78.6% | 11697 | 9592 | 82.0% | 29346 | 23189 | 79.0% |
| PCTs | | | | | | | | | | | | |
| Walsall Teaching* | 746 | 431 | 57.8% | 763 | 461 | 60.4% | 823 | 671 | 81.5% | 2332 | 1563 | 67.0% |
| Units | | | | | | | | | | | | |
| Walsall Manor Hospital* | 819 | 488 | 59.6% | 797 | 470 | 59.0% | 864 | 705 | 81.6% | 2480 | 1663 | 67.1% |

Data quality

The gestation at booking is validated by dating scans. However, standards of record keeping, and in particular the record of completion of medical and social risk assessment, vary in quality, as demonstrated by our recent regional audit. *Data quality issue identified in Q1 & Q2

Performance & Progress

Unit has made excellent progress and has achieved the target in Q3.

Additional comments

Further improvement needs to be maintained as the DH's aim is to increase the national target to 90% by end 2010/11.

Units offering a home booking service tend to have a higher attainment rate and a more comprehensive assessment of social needs.

A locality based community midwifery service model offers economies of scale and increased capacity in achieving this target.

The forthcoming annual report will contain analyses according to subgroups such as parity, maternal age and ethnic origin.

We will also be able to provide rates according to midwifery caseloads and how they relate to medical and social risk.

KPI 1b: Two antenatal contacts before 13 weeks

Target: 60%

| | | |
|-------|--------|-------|
| < 40% | 40-59% | ≥ 60% |
|-------|--------|-------|

www.pi.nhs.uk/rpnmlfH_KPI_Evidence_Targets.pdf

| | KPI 1b - Two antenatal contacts before 13 weeks | | | | | | | | |
|------------------------|---|------|-------|--------------------------|------|-------|-----------------------------------|-------|-------|
| | Q2 | | | Q3 | | | Total / average over period Q2-Q3 | | |

| West Midlands | 11065 | 4548 | 41.1% | 11843 | 5785 | 48.8% | 22908 | 10333 | 45.1% |
| PCTs | | | | | | | | | |
| Walsall Teaching | 791 | 561 | 70.9% | 838 | 604 | 72.1% | 1629 | 1165 | 71.5% |
| Units | | | | | | | | | |
| Walsall Manor Hospital | 872 | 599 | 68.7% | 905 | 611 | 67.5% | 1777 | 1210 | 68.1% |

Comment:

KPI 1b is added as a secondary indicator based on recommendation within NSF Standard 11 (collected since Q2).

It reflects practice in some units, however many do not have the capacity currently to fulfil this target.

Walsall has the best results in the region for this indicator.

KPI 2: Antenatal continuity of carer

Target: 75% of visits by the same midwife

| | | |
|-------|--------|-------|
| < 40% | 40-74% | ≥ 75% |
|-------|--------|-------|

www.pi.nhs.uk/rpnm/lfh_KPI_Evidence_Targets.pdf

| | KPI 2 - Continuity of Carer (75% of visits by the same midwife) | | | | | | | | | | | |
|------------------------|---|------|-------|--------------------------|------|-------|--------------------------|------|-------|-----------------------------------|-------|-------|
| | Q1 | | | Q2 | | | Q3 | | | Total / average over period Q1-Q3 | | |
| | Cases with required data | n | % | Cases with required data | n | % | Cases with required data | n | % | Cases with required data | n | % |
| West Midlands | 7037 | 3020 | 42.9% | 11317 | 4335 | 38.3% | 11911 | 4425 | 37.2% | 30265 | 11780 | 38.9% |
| PCTs | | | | | | | | | | | | |
| Walsall Teaching | 790 | 248 | 31.4% | 808 | 251 | 31.1% | 844 | 330 | 39.1% | 2442 | 829 | 33.9% |
| Units | | | | | | | | | | | | |
| Walsall Manor Hospital | 897 | 258 | 28.8% | 886 | 266 | 30.0% | 908 | 330 | 36.3% | 2691 | 854 | 31.7% |

Data quality

Ascertainment of this data item is sometimes difficult because of illegible signatures or care providers' names not being recorded.

Performance & Progress

Results show variation between units; commentary from midwives suggest that this target is particularly challenging due to limited capacity.

Additional comments

IfH Project Board have agreed to review this indicator upon completion of 12 months of data collection.

Dispersed service models of community maternity impact upon continuity. Commissioners and providers should consider a locality based service to increase economies of scale, reduce travel and permit greater cohesion of maternity care within the community.

KPI 3: Antenatal detection of fetal growth restriction

(FGR = fetal growth restriction; IUGR = intrauterine growth restriction; SGA = small for gestational age)

Target: increase by >10% per year

IfH 3-year project target: 60% detection

www.pi.nhs.uk/rpm/IIfH_KPI_Evidence_Targets.pdf

| | KPI 3: Antenatal detection of fetal growth restriction | | | | | | | | | | | | |
|------------------------|--|--|-------|--|-------|--|-------|--|--------------|--|-------|---|--------------|
| | Q1-Q3 | | | | | | | | | | | | |
| | Cases with required data (Q1-Q3) | Births with FGR (birthweight <10th cust.centile) | | Of all births with FGR, cases where SGA, FGR or IUGR was recorded in antenatal notes | | Of births with FGR, cases with one or more EFW <10 cust. centile | | Record of either SGA/FGR/IUGR in the notes, or: EFW <10th customised centile | | Subgroup: of births with FGR, cases scanned following fundal height assessment | | Of cases scanned following fundal height assessment, cases diagnosed as FGR | |

| Walsall Teaching | 2275 | 418 | 18.4% | 100 | 23.9% | 112 | 26.8% | 132 | 31.6% | 177 | 42.3% | 108 | 61.0% |
| Units | | | | | | | | | | | | | |
| Walsall Manor Hospital | 2485 | 444 | 17.9% | 111 | 25.0% | 121 | 27.3% | 145 | 32.7% | 190 | 42.8% | 119 | 62.6% |

Data quality

Because this indicator describes a subgroup (antenatal detection) of a subgroup (cases with FGR), we present combined data for Q1-3.

'Antenatal detection' is based on close scrutiny of case notes and growth charts. Case note audit of FGR cases has shown that ascertainment by data clerks is reliable. However, clinicians' recording of detection of SGA / FGR / IUGR is often poor; therefore an EFW <10th centile was used as an additional indicator.

Performance & Progress

FGR rates are higher in Walsall than in the West Midlands as a whole (18.4 and 14.1%). Rates vary with factors such as deprivation and smoking.

Antenatal detection based on the actual record in the notes is low, in keeping with the WM overall.

To give a further assessment, we also report on the number of cases where at least one EFW below the 10th centile line was recorded.

This shows mostly overlap, but also additional cases 'detected'. The column in bold lists the either / or detection rate.

We also present the referrals for scan on the basis of fundal height measurement plotted on customised charts; this shows that, **for those referred, the detection rate is substantially higher**.

Additional comments

More detailed analysis will be presented within the 12 month report.

Confidential enquiries into perinatal deaths have highlighted importance of GROW training for all staff (provided in twice-monthly workshops by PI)

KPI 4a: Smoking in pregnancy

**Target: to reduce smoking at delivery to
< 15% by 2010 or 1% per year**

| | | |
|-------|--------|-------|
| > 18% | 15-18% | < 15% |
|-------|--------|-------|

Smoking Cessation

| | Cases where both booking and delivery information present | | | |
|-------------------------|---|---------------------|----------------|-------|
| | Smokers at booking | Smokers at delivery | Cessation rate | |
| | n | n | n | % |
| West Midlands | 4904 | 3676 | 1228 | 25.0% |
| PCTs | | | | |
| Walsall Teaching | 448 | 320 | 128 | 28.6% |
| Units | | | | |
| Walsall Manor Hospital | 499 | 358 | 141 | 28.3% |
| British Europeans | 4619 | 3511 | 1108 | 24.0% |
| Teenagers (< 18) | 233 | 187 | 46 | 19.7% |
| British Teenagers (<18) | 215 | 173 | 42 | 19.5% |

Data quality

The information represents individual case-by case data and is therefore considered more accurate than unit estimates.

Wherever possible, the smoking-at-delivery information should be ascertained as part of the maternal history at the time of admission to delivery suite

Performance & Progress

The target has been achieved, with Walsall showing good cessation rates.

Teenagers have higher smoking rates and lower cessation rates than the general maternity population. Because of small numbers, WM figures only are given for this group.

Additional comments

Further analysis of the effect of smoking on perinatal outcome, and its association with prematurity and fetal growth restriction, will be presented in the 12 month report.

NB regionally, referral and cessation rates are higher in units where an OPT-OUT policy is in operation for referral to smoking cessation services

KPI 5: Initiation of breastfeeding within 48hrs

Target: increase by 2% per year

| < 1% | 1-2% | ≥ 2% |
|------|------|------|
|------|------|------|

www.pi.nhs.uk/rpnm/lfH_KPI_Evidence_Targets.pdf

| | KPI 5 - Breast Feeding Initiated within 48hrs | | | | | | | | | | | |
|------------------------|---|------|-------|--------------------------|------|-------|--------------------------|------|-------|-----------------------------|-------|-------|
| | Q1 | | | Q2 | | | Q3 | | | Total / average over period | | |
| | Cases with required data | n | % | Cases with required data | n | % | Cases with required data | n | % | Cases with required data | n | % |
| West Midlands | 5671 | 3279 | 57.8% | 10340 | 6051 | 58.5% | 10246 | 5895 | 57.5% | 26257 | 15225 | 58.0% |
| PCTs | | | | | | | | | | | | |
| Walsall Teaching | 680 | 338 | 49.7% | 777 | 391 | 50.3% | 749 | 331 | 44.2% | 2206 | 1060 | 48.1% |
| Units | | | | | | | | | | | | |
| Walsall Manor Hospital | 788 | 392 | 49.7% | 844 | 421 | 49.9% | 782 | 325 | 41.6% | 2414 | 1138 | 47.1% |

West Midlands

| | | | | | | | | | | | | |
|-------------------|------|------|-------|------|------|-------|------|------|-------|-------|-------|-------|
| Teenagers (< 18) | 140 | 37 | 26.4% | 228 | 77 | 33.8% | 222 | 67 | 30.2% | 590 | 181 | 30.7% |
| British-Europeans | 4245 | 2299 | 54.2% | 7747 | 4319 | 55.8% | 7501 | 4036 | 53.8% | 19493 | 10654 | 54.7% |

Data quality

Collection of this indicator is difficult because:

1. Reliance on the labour record is insufficient as breastfeeding may not have commenced yet before discharge;
2. The postnatal notes are taken home by the mother and there is often a delay before they are available to the data clerks; or
3. The time of commencement is not recorded. Improved documentation around time of first breastfeed is vitally important.

Performance & Progress

Breastfeeding initiation in Walsall is below the regional average

Additional comments

Target in terms of yearly increase will be able to be reported on next year, with current year used as a baseline
